Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

	Application No.	Applicant(s)				
Office Action Commence	10/575,310	DUPPER ET AL.				
Office Action Summary	Examiner	Art Unit				
	CARLOS E. GARCIA	2627				
The MAILING DATE of this communication app Period for Reply	ears on the cover sheet with the c	orrespondence address				
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

NON-FINAL REJECTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 7/01/2010 has been entered.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless – (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-2, 4 and 6-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Fukutani et al. (US 2002/0084704; hereinafter Fukutani).

Re claims 1 and 6: Fukutani discloses a drive for storage media in disc form (para.0002), having a turntable (Fig.1-7; including items 2/16/17/18) with a bore 16a (defined in Fig.2-4) in which a motor shaft 1 of a drive motor is located,

the diameter of the bore being greater than the diameter of the motor shaft (as shown in Fig.4 for example), such that there is a gap (spacing where adhesives 22a/22b are placed) between a wall 21/23 of the bore and the motor shaft,

wherein the turntable is fixed to the motor shaft with an adhesive 22a/22b or another material filled in the gap between the wall of the bore and the motor shaft (para.0061), as recited in claim 1.

Fukutani further discloses a drive for storage media in disc form, having a turntable with a bore in which a motor shaft of a drive motor is located,

the turntable comprising at least a first part 17/18 mounted on the motor shaft (as shown in Fig.1) and a second part 16,

wherein the second part is fixed to the motor shaft (Fig.4) and/or the first part with an adhesive or another material filled in a gap between the second part of the turntable and the motor shaft and/or a gap between the second part of the turntable and the first part of the turntable, <u>as recited in claim 6</u>.

Re claim 2: Fukutani further discloses wherein the bore is substantially cylindrical (Fig.3).

Re claim 4: Fukutani further discloses wherein the bore is substantially conical (Fig.2).

Re claims 7-8: Both method claims and their corresponding steps are rejected under the same reasoning as above. Please refer to claims 1 and 6.

Furthermore, the step of "adjusting the inclination and/or lateral position of the turntable (or second part of the turntable) in relation to the motor shaft" is interpreted as

Application/Control Number: 10/575,310

Art Unit: 2627

requiring that bore 16a must be placed so that at least the lateral position of 16 is centered on shaft 1 for proper attachment as shown in Fig.1.

Page 4

Re claims 9 and 10: Fukutani further discloses a device for reading from and/or writing to recording media in disc form, including the drive (inherently, information-recordable/reproducible disks require a device to read and write data).

Response to Arguments

4. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

- 5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Katagiri also discloses a motor shaft, turntable with bore and adhesive to attach turntable and shaft.
- 6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Carlos E. Garcia whose telephone number is 571-270-1354. The examiner can normally be reached on 8:30 am to 5:00 pm, Monday thru Thursday and 8:30 to 4:00 pm, Fridays. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Andrea Wellington can be reached on 571-272-4483. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
